FOODS HIGH IN SOLUBLE FIBRE

Let's start with soluble first. Your large intestine is where water is extracted from your bowel, and if you suffer with constipation your stool can sit in your large intestine for longer than normal and this results in a hard, large and painful bowel movement, not pleasant. Soluble fiber helps draw and keep water in your large intestine making your stool softer (creating a gel like texture) and easier to pass.

- Oatmeal
- Oat Cereal
- Lentils
- Apples
- Oranges
- Pears
- Oat Bran
- Strawberries
- Nuts
- Flaxseeds
- Beans
- Dried Peas
- Blueberries
- Psyllium
- Cucumbers
- Celery
- Carrots
- Pumpkin
- Papaya
- Raspberries
- Chia Seeds
- Pumpkin Seeds
- Potatoes

FOODS HIGH IN INSOLUBLE FIBRE

Insoluble fiber adds bulk to your stool. Now, some people when think when the doctor tells them to eat more roughage, they go ahead and eat tons of nuts, whole wheat bread and ‘Kellogs All Bran cereal’, and this is where constipation worsens! Too much insoluble fiber makes large and hard to pass stools, but the truth is we need insoluble fiber to move the stool through the colon in a timely manner especially if you suffer with colonic inertia...punctuality is important like we say in Britain!

- Whole Wheat
- Whole Grains
- Wheat Bran
- Corn Bran
- Seeds
- Nuts
- Barley
- Couscous
- Brown Rice
- Bulgur
- Zucchini
- Celery
- Broccoli
- Cabbage
